

Concrete Industry Board Educational Seminar Wednesday, March 21, 2018 - 12 noon

Speaker: Steven J. Bongiorno, P.E., S.E. – Structural Engineer

Topic: “*CONSTRUCTION WITH THREADED BAR REINFORCING*” - live presentation

Location: New York Athletic Club, 59th & 7th Avenue – 180 Central Park South

As concrete structures continue to become taller and more complex, the use of threaded bar reinforcing systems (HPCR) is becoming even more prevalent. While it is important that the construction industry understand and appreciate the benefits of these systems in order to maximize their efficient use in concrete structures, it is critically important to also recognize the unique construction related issues associated with them. This lecture will cover the basic features and benefits of threaded bars reinforcing systems, as well as their unique planning, coordination, detailing, pricing, procurement, fabrication, erection and installation issues.

Mr. Bongiorno is an independent Structural Engineering consultant who provides consulting and value engineering services to owners and contractors. He specializes in design and construction using High Performance Concrete Reinforcing Systems (HPCRS), for which he also develops new applications and construction technologies.
Learning Objectives:

- 1) Overview of current threaded reinforcing bar systems
- 2) Features, Benefits and Limitations of threaded Reinforcing Bars
- 3) Project Planning and coordination
- 4) Cost Estimating and Procurement
- 5) Fabrication and Erection
- 6) Installation

Professional Development Hours (1.0 PDH accredited)

Reservation deadline: 3/16/18

Reservations not cancelled by 3/16/18 will be billed.

\$75 Members with payment received by 3/16/18

\$85 Nonmembers with payment received by 3/16/18

\$95 No admittance without payment @ the door (seating not guaranteed)

\$200 (to sponsor educational seminar (seat not included)

Business attire required (Jacket and tie - No jeans or sneakers)
